Mai Tran

San Francisco, CA · (415) 555-0142 · mai.tran@example.com · linkedin.com/in/mai-tran-dev · github.com/maitran-dev

Experience

Senior Software Engineer, Brightline Analytics, San Francisco (March 2022 – present)

• Lead the ingestion platform that loads 4 billion events a day from Kafka into PostgreSQL and S3 (Python, Go).

• Built an internal tool that drafts SQL from plain-English questions with an LLM; 300 weekly users across sales and support.

• Cut the nightly batch from 6 hours to 50 minutes by moving it to incremental loads.

Software Engineer, Northwind Logistics, Oakland (July 2019 – February 2022)

• Wrote the shipment-tracking API (Go, gRPC) used by 40 partner carriers.

• Built integrations with carrier systems over REST, SFTP and EDI, with retries and alerting.

Open source

• Author and maintainer of tidewater (github.com/maitran-dev/tidewater), a small Python library for retrying flaky HTTP calls.

Education

University of California, Berkeley: B.S. in Computer Science, 2019

Skills

Python, Go, SQL, PostgreSQL, Kafka, AWS (S3, Lambda, ECS), Docker, Terraform, LLM APIs. Remote and hybrid teams since 2020.

Languages: English (native), Vietnamese (fluent).
